

WWTPAN ridge cap

Description

Edge tile - functional finishing of the Panorama roof system

Edge tile is an element of the Panorama roof system and is used for installation on the edges of the roof. The ready-made element shortens the assembly time and allows for aesthetic and professional finishing of the roof surface.

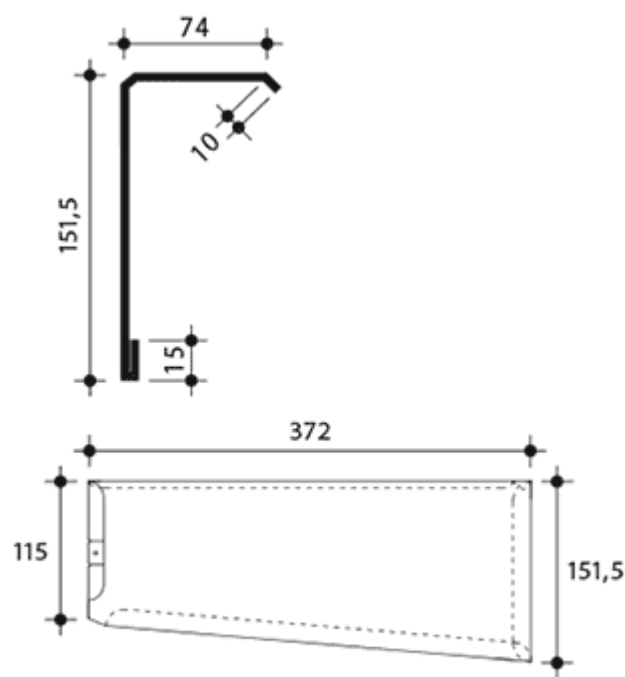

In the Balex Metal offer you can find two models of edge tile:

- left edge tile WWTPAN/L
- right edge tile WWTPAN/P

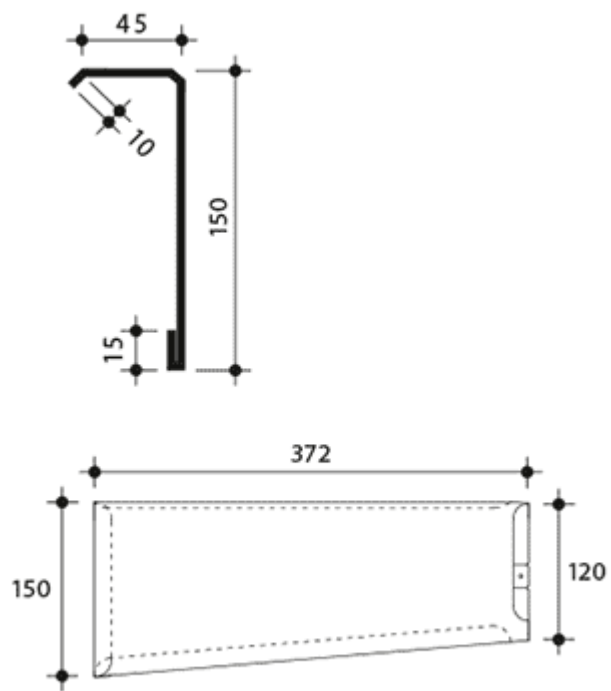

The purpose of installing edge tiles is to ensure a harmonious finish of the entire surface of the roof and to protect the layers below the roof covering from external factors. The use of complete system solutions from Balex Metal allows you to receive a 50-year warranty for the entire roof.
